1st Given Name Surname

dept. name of organization (of Aff.)

name of organization (of Aff.)

City, Country

email address or ORCID

2nd Given Name Surname

dept. name of organization (of Aff.)

name of organization (of Aff.)

City, Country

email address or ORCID

3rd Given Name Surname

dept. name of organization (of Aff.)

name of organization (of Aff.)

City, Country

email address or ORCID

4th Given Name Surname

dept. name of organization (of Aff.)

name of organization (of Aff.)

City, Country

email address or ORCID

5th Given Name Surname

dept. name of organization (of Aff.)

name of organization (of Aff.)

City, Country

email address or ORCID

6th Given Name Surname

dept. name of organization (of Aff.)

name of organization (of Aff.)

City, Country

email address or ORCID

Abstract—This document is a model and instructions for \LaTeX . This and the IEEEtran.cls file define the components of your paper [title, text, heads, etc.]. ***CRITICAL: Do Not Use Symbols, Special Characters, Footnotes, or Math in Paper Title or Abstract.**

Index Terms—component, formatting, style, styling, insert

I. REQUIREMENTS SPECIFICATION

II. REQUIREMENTS SPECIFICATION

Before we can begin to understand the relationship between big data systems and microservices patterns, we first need to understand the requirements of big data systems. Requirements can range from formal specifications to back of the napkin sketches to high-level abstract statements. For the purposes of this study, we are not looking for environment specific or stakeholder specific requirements, but we are interested in high-level software and system requirements.

Sommerville ([?]) classified requirements into three levels of abstraction that are namely 1) user requirements, 2) system requirements and 3) design specifications.

Identify applicable funding agency here. If none, delete this.
